All that can Heal

CORONA COVID-19, LIFESAVING, LUNG PROBLEMS, PORTULACA, URGENT

## Very urgent

Date: June 23, 2021 Author: harold jitschak bueno de mesquita © 6 Comments —  
I HAVE A DREAM....WHO KNOWS WHAT IS WAITING.

If anyone of you would like to act a bit “prophetically” and probably also -B”H-may make a big profit then I would like you to call me.

It is about planting portulaca NOW [before the shemita year] in a big field which one may have to hire,if you are not in the possession of such a field.

[even if there was no shemita Portulaca grows only in the warm months]

I am not a farmer, but I know that portulaca oleracea grows very easily with minimal care.

A huge amount could then be harvested before the shemita year and dried or even better freeze-dried [which can be stored for very long]

I know for sure [with human certainty and wiht years of experience ]that Portulaca is the best anti-flu herb[prevention and treatment] against all the strains we had.

You can find many articles about it on wordpress and also why I started using it in 2009.

Search for one of these words:

covid-9/portulaca/corona and even flu.

In the past year[or 1 1/2 year] I have seen it working great as a prophylaxis for Corona [I suggested this because of the good results we had with flu] and also as a treatment if given before very critical situations and I only can pray that this will continue to be the case.

Portulaca tremendously can protect the lungs form edema![Fluid accumulation]

Only from Haiti and Taiwan[especially] there is evidence that Portulaca is well known and Taiwan has published especially about the anti-flu effect of portulaca, but this was for “obvious reasons” [to me] ignored by the “scientific world”, including the WHO!

In Haiti, it has been used at least by one person/clinic for Corona.

No doubt that Pfizer should have in their HUGE data-base the herb somewhere ,but maybe in a small “corner”[it could be a big danger!]

Hello Dr.

I might have the ability to hire this kind of field and interested to hear more details about the project,

thanks Yoav Krisie

Hello Dr. De Mesquita,

I have a 'shetach' – my front lawn, which is not a lawn and is just dried out ground. If you knew someone who was interested to make it viable and plant portulaca, let me know. I am going to estimate that it's maybe 4 meters x 10 or so meters of space.

Thank you,

~Rivka Ester Rothstein
